STRAX: VR PRODUCT AWARDED “BEST WEARABLE MOBILE TECHNOLOGY”

Orange has won the category for Best Wearable Mobile Technology with its VR1 Headset at the GSMA GLOMO Awards at Mobile World Congress. Developed by Strax, the VR1 Headset looks to enhance the VR category with a universal fit headset with integrated audio.

This award recognizes Orange’s commitment to broaden the VR accessory category, at an attractive price for customers of both IOS and Android handsets. Creating a product with features deeply appreciated by consumers, and working with Orange to develop the ‘Go to market’ position, clearly shows the incredible value-add Strax offers its clients.

“Connected devices such as the VR headset developed for Orange is an area attracting ever increasing interest from both the industry and end consumers. Strax is very well positioned in the segment with expertise that clearly separates us from the competition. The cooperation on this product with Orange is not only an award winning project but also a great business success as well.” says Gudmundur Palmason, CEO Strax AB.

About Strax

STRAX is a global company specializing in mobile accessories and connected devices. STRAX is listed on the Nasdaq Stockholm Stock Exchange. STRAX offers proprietary, licensed and partner branded accessories. The proprietary brands include XQISIT, GEAR4, Urbanista, THOR and FLAVR.
